

WHAT IS CLAIMED IS:

1. A syringe comprising a syringe barrel having a plurality of non-volumetric measuring indicia thereon.
2. The syringe of claim 1, wherein said plurality of non-volumetric measuring indicia comprise numeric indicia.
3. The syringe of claim 1, wherein said plurality of non-volumetric measuring indicia comprise a plurality of color indicia.
4. The syringe of claim 1, wherein said plurality of non-volumetric measuring indicia comprise a plurality of weight indicia.
5. The syringe of claim 1, wherein said plurality of non-volumetric measuring indicia comprise a plurality of age indicia.
6. The syringe of claim 1, wherein said plurality of non-volumetric measuring indicia comprise a plurality of height indicia.
7. The syringe of claim 1, further comprising a means for adjusting the location of said plurality of non-volumetric measuring indicia with respect to said syringe barrel.
8. A container comprising:
at least one chamber;
a plurality of non-volumetric measuring indicia on said at least one chamber; and
an opening control device in said at least one chamber for allowing liquid contained in said at least one chamber to be withdrawn from said at least one chamber.

9. The container of claim 8, wherein said opening control device comprises a needle receiving section for being penetrated by a syringe needle.

10. The container of claim 8, wherein said opening control device comprises an opening and a covering material for sealing said opening and for being penetrated by a syringe needle.

11. The container of claim 8, wherein said plurality of non-volumetric measuring indicia comprise numeric indicia.

12. The container of claim 8, wherein said plurality of non-volumetric measuring indicia comprise a plurality of color indicia.

13. The container of claim 8, wherein said plurality of non-volumetric measuring indicia comprise a plurality of weight indicia.

14. The container of claim 8, wherein said plurality of non-volumetric measuring indicia comprise a plurality of age indicia.

15. The container of claim 8, wherein said plurality of non-volumetric measuring indicia comprise a plurality of height indicia.

16. The container of claim 8, wherein said at least one chamber has a rectangular cross-section.

17. The container of claim 8, wherein said at least one chamber is tapered.

18. The container of claim 17, wherein said at least one chamber is right-triangularly tapered.

19. The container of claim 8, wherein said at least one chamber comprises a plurality of chambers.

20. The container of claim 19, wherein said plurality of chambers comprise modular chambers.

21. The container of claim 19, wherein said plurality of chambers comprises a rectangular block of chambers.

22. The container of claim 19, wherein said plurality of chambers comprises a right-triangularly tapered block of chambers.

23. The container of claim 19, wherein said plurality of chambers comprises a solid cylinder of chambers.

24. The container of claim 19, wherein said plurality of chambers comprises a hollow cylinder of chambers.

25. The container of claim 19, wherein said plurality of chambers comprises a solid cone of chambers.

26. The container of claim 19, wherein said plurality of chambers comprises a hollow cone of chambers.

27. The container of claim 8, further comprising a recalibration means for adjusting the location of said plurality of non-volumetric measuring indicia with respect to said at least one chamber.
